Earl of Leicester's Monument, at Holkham, cost 4,000 guineas.—R. N. Bacon, Hon. Secretary. Dec. 20.

TO OUR CORRESPONDENTS.

"G. Clifford."—Try 10, Berners-street, Commercial-road, East.

"A. Lyon Subscriber."—We thank him, and will endeavour to effect what he suggests. He will see we have made use of his favour.

"T. M. V. and Mr. Avery."—Their acceptable papers will be made use of.

"R."—It is difficult for us to get at the whole particulars in such cases as he advert to; but it is desirable, and we will try. If he will furnish us with the information that falls in his way, he will greatly oblige us. We are glad to hear his satisfaction.

"James Wall, Worcester."—We will endeavour to bring his paper forward.

"A. Forster."—We will excuse our delay.

"S. Stonehouse, Margate."—We will not forget him on the carrying out of arrangements necessary to bring of service to him.

"Overlook."—His plan is good, but well known.

"A Citizen, with others."—Many complaint of Mr. Thomas George, of Hendon. He does not attribute impropriety or selfish motives to Mr. G., but fears the consequence which such a precedent would lead to, and he urges other objections, we must say, in a fair and friendly spirit. We will take care that the evil he apprehends does not run to any greater extent than to enable us to handle it. We sometimes suffer words to grow that we may the more effectually uproot them.

"B. E. N., Marblehead."—We have many plans and suggestions for small houses that we must condense by some means along with his valuable ones.

"T. S. R."—His communications are returned, and only postponed through a press of matter.

"Mr. Mculloch."—We will find the best answer we have been enabled to procure him in this day's paper.

"James Pichard."—He deprecates the discussion "Classic not Christian," as raised upon the design for a church in the classic style in No. 32 of THE BUILDER, and says it is foreign to the principle of practical criticism. He objects to the principle of windows over the basement in that design, the modern practice of placing a mass of masonry on the portico; the joinery-like panels, and the sameness produced by so many ranges of columns one over the other.

"W. C."—on small street houses. The same remark as to "B. E. N." applies.

CHAPMAN'S PATENT PAPER CLOTH.—"G. L. B." has our thanks for calling attention to this beautiful article. It will be beyond account most valuable to architects, engineers, surveyors, &c., on the card sets forth. It is superior to almost all other papers. Can be had in sheets of any length, and up to four feet wide, without a joint, and of different substances and qualities, according to the purpose for which it is intended. It is a paper mounted upon, or incorporated as it were with cloth. Several of our friends have inquired how they should accomplish that in respect of large paper drawings which this supplies, and we are most happy in announcing it to our readers.

"A Carpenter."—We are sorry to ask him to wait an answer till next week.

PUBLIC HEALTH.—Pressure of other matter compels us to postpone the continuation of the article.

"Edwin Phear Pastor."—We are afraid the matter has "fallen through" upon which he writes.

"A Mechanic."—has our best thanks. We will examine his contribution.

"A Young Student."—His remarks are much to the purpose. We could explain satisfactorily, but our best answer is the "general issue," as the lawyers say.

"O. V."—His letter was mislaid, but must appear for the sake of the better feeling it incited, and the other rains.

"W. H. M."—His small house design must be dealt with as the rest.

"J. C., a Constant Reader," will appear.

"H."—We beg to acknowledge the receipt of his communication of the 10th ult.

"S. M. A."—will find his inquiries answered concerning the Climadining Institution.

"Bradbeer, Exeter."—His kind suggestions have been attended to, and the parcel forwarded.

"Ticnor."—His favour is to hand, for which he will please to accept our best thanks.

"Mr. Saul."—His kind attention presses on us. We must acquit ourselves by a wholesale disposal of his favours.

"A Prestonian."—We will endeavour to satisfy him at our first leisure.

"Alpha, Glasgow."—We must find room for part, if not the whole, of his kind structures.

"Mr. Glegg's" design for a Statue Memorial may perhaps be inserted, but we wish he had given some of the reasons for determining him to be the choice of his column.

"G. R. F."—The design for a National Gallery will be inserted, if we can accomplish it within our plans.

"Felix."—is not happy in his structures. Surely Mr. Glegg's reputation is above so much measured commendation. What, if Mr. Glegg himself be of an unhappy temperament, and show it in his bearings, is this a reason for degrading the acknowledged and large share of merit in his work? Few men, we will undertake to say, could have got so far in such a short space as his Encyclopaedia. Never

avoid poking at a man's weak point as if little talents could only be content with continually reminding the greater of the distinguishing points of their common mortality. We will not attempt to say we are indifferent to Mr. Glegg's opinion of THE BUILDER, if he ever reads it, of which we know nothing. We should indeed be sorry to hear the serious censure of any such a man; his cogent objections we could afford to be silent under, out of respect to his proper self.

"Robert H. Jackson."—Assuredly he will. "B." On Double Catalogues, will be set forth. We must postpone the notice of several other favours.

The block plan of the Infant Orphan Asylum in last week's number was drawn to a scale of six-eighths of an inch to ten feet.

"A Friend."—Just received as we are going to press.

Mr. Dirck's "papers told for this work, and will be considered for the next.

ERRATA.—At page 148, column 2, line 15, for "books" read books.

ADVERTISEMENTS.

DESTRUCTION OF RATS AND MICE WITHOUT ARSENIC. THE DUPOUX, which has received the approval of the most celebrated Chemists in France, Every information may be obtained and orders received at the office, 48, Lombard-street, City.
